

CCC LABELLING SOLUTIONS

Cedar Creek Company Labelling Solutions

Labelling Solutions OVERVIEW

OUR INTEGRATED LABELLING SOLUTIONS, INCLUDE:

- Premium quality, reliable field tested products
- Labels designed specifically for industry applications
- Exclusive innovative product lines
- Total traceability package solutions

PREMIUM INTEGRATED LABELLING SOLUTIONS - FOR EVERY APPLICATION

If you are looking for labelling solutions, look no further. SASTEK have an extensive range of premium products designed specifically for the meat, poultry and seafood industries.

With extensive experience and knowledge in each of these sectors, our labels have been developed and refined to specifically meet the demands of the world's harshest work environments. Designed to be integrated with SASTEK hardware and software solutions, they enable maximum uptime and work flow continuity, and facilitate total traceability throughout the workplace.

SASTEK's close working supplier relationships enable us to bring you the newest and most

innovative labelling solutions. We purchase in large volumes, which means that you get genuine value-for-money.

In providing a huge range of products to the industry, our goal is to exceed your expectations by delivering the best.

We can provide:

- Branded process printed thermal inserts
- Custom designed port marks and pre I.D labels
- Unusual sized and shaped labels that are not commonly available

“ Our industry specific expertise combined with an extensive selection of labelling products means that we can help you find effective solutions to almost any problem

THE COMPLETE CEDAR CREEK COMPANY LABELLING RANGE

SASTEK Carcase Tags

A selection of tags designed to cater for processors of all species. These USDA approved 'fit for purpose' tags provide improved scan-ability and print head life, as well as optimising printer performance and reducing down time.

Paper Labels

Coated & uncoated, plain & red bordered, in varying sizes for all applications // Premium grade thermal top sheet with a high grade freezer adhesive // Batch coded for identification and traceability // Your choice of Security cuts for tamper evident security

Synthetic Labels

Plain & red bordered in varying sizes for all applications // Specifically designed for use in high moisture environments // Premium Grade top sheet with high grade freezer adhesive // No wrinkling ensures high barcode scan rates // Batch coded for ID & traceability // Security cuts for tamper evidence // Excellent choice for GSI compliant export consignments.

Removable Crate Labels (Poultry)

Our new generation synthetic one piece labels with special removable adhesive are designed specifically for ease of removal from crates and tubs used within perishable food processing environments, reducing contamination and improving food safety.

Food Approved Inserts

Blank or printed in your specific house brands SASTEK offers high temperature thermal inserts that can be printed either in batch mode, or on-demand for insertion into bags prior to the shrink process.

Retail & Prime Cut Labels

High quality printed house brand labels to meet all of your prime cut labelling requirements, or plain labels manufactured to size for in-house batch printing.

GSI Compliant Wrap-around Labels

Available in paper or synthetic options // Designed to be applied to two panels per carton as required by some retailers // Designed to accommodate EAN128 barcode symbology and meet GSI compliance

Print Heads

SASTEK hold large stocks of print heads to fit most Intermec printers
